Product Features

Since our foundation in 1916, we have continued to produce knitting needles following our promise to always deliver the best quality.

We only use carefully selected moso bamboo and madake bamboo grown in Japan.

Bamboo that grows in Japan is especially hard and resilient, reinforced by strong and durable fibers.

Shirotake

The surface finishing polished with natural plant wax gives Shirotake needles excellent luster and fine texture.

Koshitsu

After going through Kinki Amibari's unique high temperature and pressure treatment, Koshitsu needles are carefully polished with natural plant wax.

This special treatment gives the bamboo extra durability and helps prevent damage from outside environmental influences.

Moreover, it has an effect of preventing the needles from warping.

The surface treatment makes a comfortable and smooth movement of threads and warm touch.

Point 01

The finely ground needle tips make it easier to pick up stitches.

Point 02

The carefully polished surface is soft to the touch and the yarn slides off easily.

Point 03

The size is laser-printed so it won't rub off.

Point 04

KA knitting needles use a rotating swivel cord to prevent the cord from twisting.

Point 05

The asymmetric circular needle is a KA original product developed to knit small diameter tubes such as socks comfortably. One of the needles is just one centimeter shorter than the other, and that makes a big difference in smoothness and comfort.

01 Asymmetric Circular Needles

The asymmetric circular needle is a KA original product developed in 2010 to make knitting small diameter tubes such as socks comfortably. One of the needles is just one centimeter shorter than the other and that makes a big difference in smoothness and comfort.

02 Circular Needles

KA original circular needles with swivel cord connectors make knitting smooth because the cord does not twist. Our circular needles are light and the cable is flexible. For knitting small diameter tubes (socks, sleeves, gloves, hats, cowls and vests), some knitters prefer using two circular needles or magic loop method instead of multiple double pointed needles to work in the round.

04 Double Pointed Needles

Double pointed needles that can make small circles are ideal for knitting small items. Attach a rubber cap to one end to use as a single pointed needle as well. Use double pointed needles to knit socks, gloves, and sleeves.

05 Crochet Hooks

Crochet and afghan hooks are perfectly formed and carefully polished to make it easier to hook the stitches and knit complex designs. Our crochet hooks with grips have grooves to make it easier to hold and to prevent slipping. The grips stabilize the tips to make knitting comfortable and less tiring on your hands. Crochet hooks come with an aluminium tip or a bamboo tip. Use crochet and afghan hooks to knit hats, bags, blankets, and other creations.

07 Interchangeable Circular Needles

■ What are interchangeable circular needles?

Interchangeable circular needles are products that allow you to mix and match cord joints, joint converters, stoppers and other parts or to customize circular needle sizes and shapes as you like.

■ We adopt 3 sizes of screw for needle tip and cord, M1.8, M2 and M4.

You can joint needle tip and cord directly with the same size of screw and downsize the screw size using the converter.

■ What to be careful of when selecting interchangeable circular needles.

If the total length of the needle tips exceeds the length of the cord, you will not be able to use them as circular needles.

■ Combine the parts.

You can extend cord lengths with Cord Joints, connect needles and cords of different screw diameters by using Joint Converters, or attach Stoppers to the end of cords to make single point needles.
