

a Sustainable Life

Bamboo is a renewable resource as it grows extremely quickly. Using bamboo means very little environmental impact and logging bamboo for products such as knitting needles means giving more room to protect our forests. One of the reasons that people have preferred bamboo throughout the years is that it is natural and environmentally friendly.

You can create knitting projects with your own hands and when trying something new, re-using and knitting into a new shape, instead of throwing it away because it is old.

Knitting Helps

In this era where many things are new, but thrown away at a dizzying speed, our time is precious.

Investing your time in your knitting projects will allow you to cherish your results.

The mission of Kinki Amibari is to enrich living and the natural environment through knitting.

Over 100 years

Continue to be particular about production

Since our foundation in 1916, we have continued to make the best use of our 100 years of accumulated skills and expertise, improving the quality of our products, and supplying the world's best quality knitting needles.

Quality

Attractiveness of bamboo knitting needles

Bamboo Knitting needles fit easily into the hand and are light and flexible.

Our graceful and beautiful knitting needles are made of natural Japanese bamboo, produced by our highly skilled craftsmen.

You can see the quality of their workmanship in our needles that are polished to perfection.

We are supplying numerous kinds of bamboo knitting needles to meet your requirements: various sizes, lengths, types and interchangeability.

We continue to follow our promise to always produce and deliver the best quality knitting needles.
